

***2005-2009 State of Wisconsin Consolidated Plan Initiative
Information Gathering Roundtable
Discussion Items***

The 5-year Consolidated Plan for housing, community, and economic development projects provides over \$50 million annually to local governments and private organizations. This is an opportunity for you to identify where resources and priorities should be directed to meet local housing, community and economic development needs.

1. What statewide needs should be identified in the State's next 5-year Consolidated Plan?
 - Economic Development
 - Housing/Homelessness
 - Public Facilities
2. If you had to choose to spend your federal dollars on a particular need which would you choose and what are the ways to address that need?
3. Should the state target geographic areas or specific populations for concentrated assistance? If so, what areas or populations?
4. Any comments/suggestions about a specific community development, housing, or economic development program?
